

HOW ICC-ES CERTIFICATION BENEFITS YOU

The International Code Council Evaluation Service is the authority on building code compliance. ICC-ES-certified building products are certified to meet the International Building Code® (IBC) and the International Residential Code® (IRC). Every Perma-Column® Precast Deck Post and FootingPad® Composite Footer is ICC-ES certified.

For builders, certification means:

- Your deck foundation products are code-compliant
- Streamlined permitting and approval processes
- Confidence of a permanent foundation

For consumers, certification means:

- Greater trust in a builder who uses certified products
- Confidence in their post-frame investment
- Peace of mind for all involved

Build with confidence knowing the full line of Perma-Column® and FootingPad® products are ICC-ES certified. Perma-Column® Precast Deck Posts and FootingPad® Composite Footers combine to create the fastest permanent foundation solution for deck projects. In addition, they are backed by a lifetime warranty, ensuring the enduring quality of your deck.

Meet the demands of a growing market

- ICC-ES certification assures code compliance
- Eliminate the hassles of mixing and pouring concrete
- Perma-Column® and FootingPad® are permanent solutions
